

Elektrobit

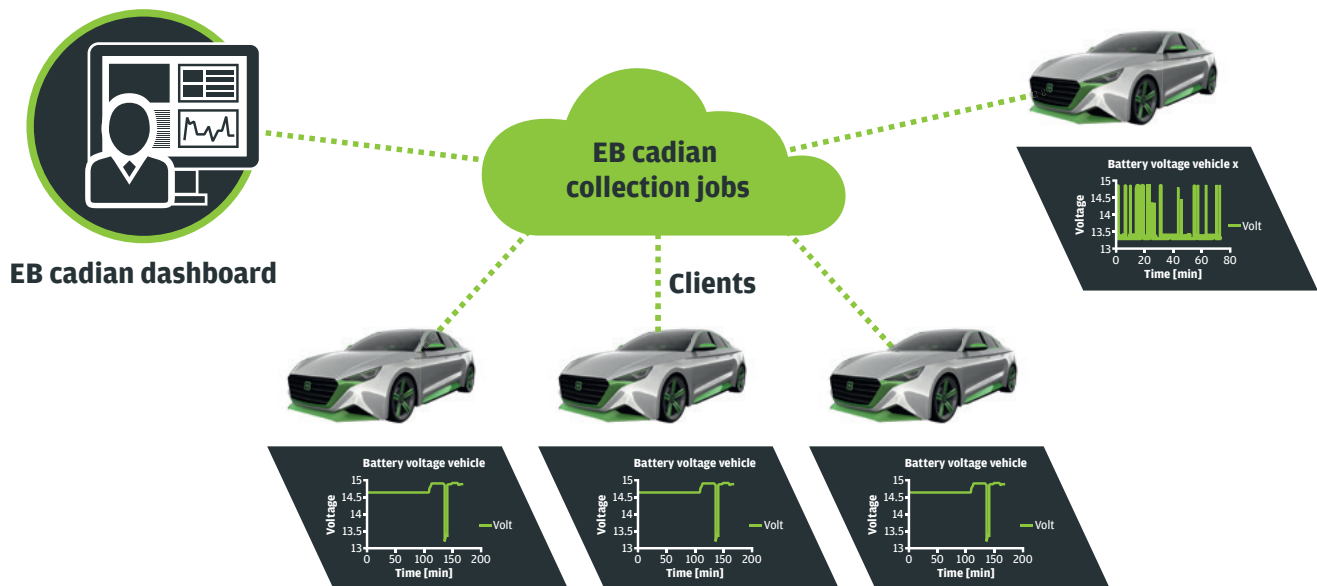

**EB** cadian

**Connect. Learn. Improve.**

**Remote analytics for connected cars**

**EB cadian** is a reliable, scalable, and secure software solution for remote analytics. Optimize your supply chain and speed up vehicle development with the help of valuable insights.

## Profit from EB cadian

- ▶ Analyze diagnostic data statistically
- ▶ Predict abnormal vehicle behavior
- ▶ Stay flexible through our scalable backend

## Key features

- ▶ Customizable and configurable surveys
- ▶ Vehicle diagnostic data extracted from ODX files
- ▶ Standardized interfaces
- ▶ Secure remote access and secure remote connection
- ▶ Diagnostic data collection on demand and in real-time
- ▶ Offline use possible (buffering and upload strategy)

## Save money and increase brand loyalty

- ▶ Gain valuable insights into your fleet on the road
- ▶ Optimize your production processes
- ▶ Improve the design of your next vehicle generation

## Benefits

- ▶ Permanent surveillance or ad-hoc surveys possible
- ▶ Standardized formats to save time and money
- ▶ Minimized security risk through state-of-the-art technologies of encryption and authentication
- ▶ Data efficiency to save bandwidth
- ▶ No dependency on network availability and connection options
