EB Assist

Supporting automated driving development

State-of-the-art hardware and software products to successfully develop, test, visualize, validate, and build automated driving functions and systems.

Highlights

EB Assist CAR Box

- ▶ PC systems for data-logging and replaying, also used within our Hardware-in-the-Loop solutions

EB Assist bus tools

- ▶ Modular I/O slot cards and modules for highly precise data-logging and replaying

EB Assist ADTF

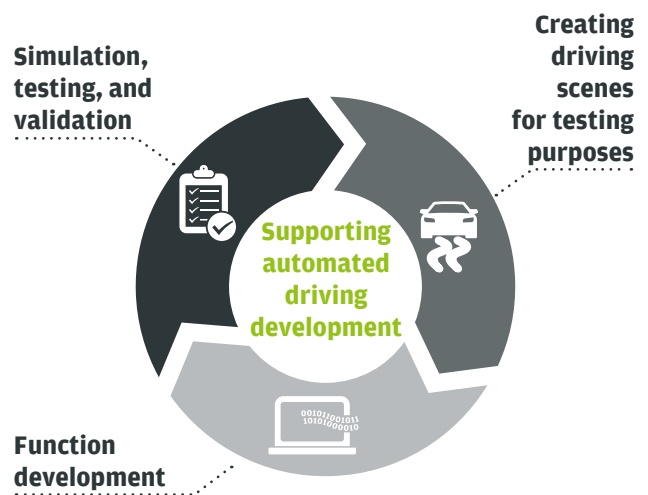

- ▶ Development framework with a wide range of toolboxes to extend functionality

EB Assist Busmirror

- ▶ Software for rest bus simulation and automated ECU testing

EB Assist Test Lab

- ▶ Cloud-based validation toolchain for automated driving

EB Assist comprises a comprehensive offering from a leader in embedded software and driver assistance development that covers major areas of automated driving development leading OEMs and Tier 1s across the world benefit from.

Benefits

- ▶ In-house hardware and firmware development enables a fast and flexible realization of your requirements
- ▶ Based on industry standards and therefore suited to fulfill the high demands when it comes to building flawless automated driving functions
- ▶ Single sourcing with one contact point in case of issues helps you save time and money
- ▶ Perfectly interlocking products that are high-performant and ready to use right from the start
- ▶ Dedicated trainings, professional consulting, and experienced support with short response times help you in achieving your goals
- ▶ Profound engineering services meet even your most exceptional needs
