2. GRANT OF RIGHTS IN LICENSED PRODUCT AND GENERATED SOFTWARE

2.1 LICENSE. In consideration of CUSTOMER's compliance with the terms and conditions of the AGREEMENT ELEKTROBIT hereby grants to CUSTOMER, under the ELEKTROBIT Intellectual Property Rights a non-exclusive, worldwide, non-transferable, fee- and/or royalty-bearing license, limited and restricted (if defined in the AGREEMENT) to

(i) a certain amount of users and/or a specific kind of access to the LICENSED PRODUCT (please see also Section 2.1.5),

(ii) the licensed term (limitation in time),

(iii) the TARGET SYSTEM (e.g. restricted to a certain defined ECU/microcontroller family 'PRODUCT LINE LICENSE'),

(iv) the PROJECT (e.g. 'PROJECT LICENSE') and/or

(v) a specific CUSTOMER PRODUCT

as agreed to in the Agreement as follows:

2.1.1. EVALUATION AND DEMONSTRATION LICENSE

(i) to use, copy, perform and internally display the LICENSED PRODUCT and/or the GENERATED SOFTWARE solely for the purposes of evaluating their feasibility for use by CUSTOMER, or as part of CUSTOMER's products and services, and

(ii) to use, copy, perform, and display the RUNTIME SOFTWARE solely as an integral part of CUSTOMER's combined soft- and hardware product for purposes of demonstrating to customers and prospective customers.

2.1.2. DEVELOPMENT LICENSE

(i) to use, execute, copy, integrate and compile the RUNTIME SOFTWARE and

(ii) to generate and configure GENERATED SOFTWARE

for the purpose of internally developing, configuring, adapting, assembling, integrating and testing CUSTOMER PRODUCTS, but not for mass production.

2.1.3. REPRODUCTION AND DISTRIBUTION LICENSE

(i) to use, copy, integrate and compile the RUNTIME SOFTWARE and/or the GENERATED SOFTWARE for the purpose of creating, testing, fabricating, producing and assembling CUSTOMER PRODUCTS; and

(ii) to make, use, import, distribute, license, offer to sell and sell such CUSTOMER PRODUCTS either directly or indirectly through a tiered or multi-tiered distribution system; and

(iii) to grant to customers a sublicense and right to distribute, offer to sell and to sell CUSTOMER PRODUCTS either directly, or indirectly through a tiered or multi-tiered distribution system; and

(iv) grant to customers the right to use such CUSTOMER PRODUCTS within the limits set out in these ELEKTROBIT T&C.

Notwithstanding the above in this Section 2.1.3, CUSTOMER acknowledges and agrees that neither the LICENSED PRODUCT nor the GENERATED SOFTWARE may be used in any series production unless explicitly released for series production by ELEKTROBIT.

2.1.4. EDUCATIONAL LICENSE

to use the LICENSED PRODUCT and/or the GENERATED SOFTWARE for educational, non-commercial purposes in universities and technical schools. With respect to ELEKTROBIT TOOLING CUSTOMER shall generate software modules in object code only and shall not disclose nor provide the

GENERATED SOFTWARE to any third party. NOTWITHSTANDING ANY OTHER PROVISION OF THIS AGREEMENT, IT IS ACKNOWLEDGED AND AGREED THAT ALL DELIVERABLES PROVIDED UNDER OR IN CONNECTION WITH AN EDUCATIONAL LICENSE ARE PROVIDED ON A STRICTLY "AS IS" BASIS, WITHOUT RECOURSE OR WARRANTY OF ANY KIND. WITHOUT LIMITING THE FOREGOING, THE PROVISIONS OF SECTIONS 5.1 AND 5.2 SHALL NOT APPLY.

2.1.5. SPECIFIC LICENSE MODELS OF ELEKTROBIT TOOLING LICENSES

Node Locked License/Single User License: The license entitles employees of CUSTOMER to use the DELIVERABLE on one personal computer owned by or under the control of LICENSEE. For Single User Licenses the license may be limited to a specified personal computer, which can be changed with ELEKTROBIT's approval only. The license does not allow to install the DELIVERABLES on multiple personal computers or otherwise enable the use of the DELIVERABLE to more than one developer, e.g. network or virtualization. This type of license is usually used in project related development teams. Every engineer has an individual license.

Dongled License: The Dongled License refers to a PC/Laptop based license, which is protected by a hardware dongle, and entitles employees of CUSTOMER to use the DELIVERABLE on a single, but not specific PC/Laptop by plug-in the dongle. The Parties could agree to restrict the Dongled License to a certain site. The license does not allow to distribute or emulate the dongle via LAN/WAN network. This type of license is usually used if several development teams work at the same development site and the license can be shared between several engineers (floating, but protected by a physical dongle).

Floating License: The Floating License refers to a server based license, which is protected by a server based hardware dongle, and entitles employees of CUSTOMER to use the DELIVERABLE globally in the licensed amount of seats. The license is protected by a license server, which controls and manages the total amount of available seats. This type of license is usually used, if licenses should be shared globally over several development sites and different time zones. Note: A LAN network connection between workstation and license server is required.

2.1.6. SOFTWARE INTEGRATED IN HARDWARE

With respect to any software licensed by ELEKTROBIT and embedded into or bundled with hardware delivered by ELEKTROBIT ('ELEKTROBIT HARDWARE'), subject to any underlying third party rights and subject to payment in full by CUSTOMER, ELEKTROBIT grants to CUSTOMER a non-sublicensable, worldwide, non-exclusive license under ELEKTROBIT's applicable IPR to use the embedded software with such ELEKTROBIT HARDWARE in accordance with the applicable user manual(s) and the AGREEMENT. Any specific provisions in the QUOTE contrary to this clause shall take precedence over the ELEKTROBIT T&C. In the absence of such specific provisions specifying the applicable license, CUSTOMER is granted a license to use one copy of embedded software in connection with the ELEKTROBIT HARDWARE. CUSTOMER is not permitted to separate the embedded software from ELEKTROBIT HARDWARE, or distribute or transfer the embedded software without the ELEKTROBIT HARDWARE.

2.2 SUBLICENSING RIGHTS. CUSTOMER is entitled to grant a sub-license in the RUNTIME SOFTWARE and/or the GENERATED SOFTWARE to

(i) its AFFILIATES, provided however that such AFFILIATE accepts the terms and conditions of the AGREEMENT and enters – on ELEKTROBIT's request - into an AFFILIATE commitment directly to ELEKTROBIT; CUSTOMER shall inform ELEKTROBIT about such AFFILIATE sub-license in advance and ELEKTROBIT reserves the right with respect to a specific AFFILIATE to disapprove the exercise of the sub-licensing right if there are reasonable concerns that such AFFILIATE will not comply with its obligations;

(ii) subcontractors, but only with respect to the license granted under Section 2.1.2. and solely for use in connection with the assembly, production, fabrication, testing and related measures (but not the sale) of CUSTOMER PRODUCTS by or on behalf of CUSTOMER, provided however, that such subcontractors are (1) bound in writing to confidentiality and to the license restrictions granted hereunder and to Section 2.8 (Non Assertion) and (2) obligated in writing to return or destroy, as applicable, the LICENSED PRODUCT and DOCUMENTATION provided to them as soon as they are not required for the purposes of performing the tasks subcontracted to them. CUSTOMER shall inform ELEKTROBIT about such subcontractor in advance and ELEKTROBIT reserves the right to disapprove the exercise of the sub-licensing right if there are reasonable concerns that such subcontractor will not comply with its obligations;

(iii) its customers within the distribution chain, but only with respect to the license granted under Section 2.1.3., provided that such customers are bound in writing to (1) confidentiality, (2) the license restrictions granted hereunder and (3) Section 2.8 (Non Assertion). Subject to Section 2.2 (ii) such customers are entitled to grant a sub-license to their subcontractors.

ELEKTROBIT is entitled to restrict the sublicense right under Section 2.2 to object code versions only.

CUSTOMER shall be liable to ELEKTROBIT for the performance of sub-licensees as for its own.

For clarity, CUSTOMER is not entitled to grant a sub-license in or to ELEKTROBIT TOOLING.

2.3 SUBLICENSING THIRD PARTY COMPONENTS. If stated in the AGREEMENT, and in consideration of CUSTOMER's compliance with the terms and conditions of this AGREEMENT, ELEKTROBIT hereby grants to CUSTOMER, during the applicable Licensed Term and under the rights identified in the AGREEMENT, a sublicense to use the applicable 3rd party components in a manner specified in the AGREEMENT.

2.6 NO COMPETITIVE USE. Notwithstanding any other term or condition in the AGREEMENT, CUSTOMER is not entitled and nothing in the AGREEMENT grants CUSTOMER a right or license to distribute the LICENSED PRODUCTS nor any modification thereof as stand-alone software solution, unless explicitly agreed to in writing in the AGREEMENT.

2.7 PROTECTION OF LICENSED PRODUCT. All information, data, drawings, specifications, documentation, software listings, source and object code (other than open source) which ELEKTROBIT may have imparted and may from time to time impart to CUSTOMER relating to the LICENSED PRODUCT is proprietary and confidential. CUSTOMER hereby agrees that it shall use the same solely in accordance with the provisions of this AGREEMENT and that it shall not at any time during or after expiry or termination of this AGREEMENT, disclose the same, whether directly or indirectly, to any third party without ELEKTROBIT's prior written consent.

2.8 NON ASSERTION. CUSTOMER hereby covenants and agrees not to bring suit or otherwise assert a claim based on INTELLECTUAL PROPERTY RIGHTS resulting from CUSTOMER's modification of LICENSED PRODUCT or derivative works thereof against ELEKTROBIT (and ELEKTROBIT's Affiliates) and/or ELEKTROBIT's licensees and their respective customers based on or arising out of ELEKTROBIT's and/or ELEKTROBIT's licensees' and their respective customers' enhancement, further development, reproduction, use, distribution, licensing or other disposal of the LICENSED PRODUCT.

2.9 UPSTREAM INDEMNITY. CUSTOMER shall defend, indemnify and hold ELEKTROBIT and its Affiliates and the employees, officers and directors of them ("ELEKTROBIT Indemnitees") free and harmless from and against any and all claims, losses, liabilities, costs, damages and expenses (including reasonable attorneys' fees and expenses) suffered or sustained by, or asserted against, any ELEKTROBIT Indemnitee arising out of or relating to the misuse of the LICENSED PRODUCT or GENERATED SOFTWARE.

2.10 RESERVATION; LICENSOR OWNERSHIP. Except for the express grants under Section 2 (GRANT OF RIGHTS IN LICENSED PRODUCT AND GENERATED SOFTWARE), no other rights or licenses in the LICENSED PRODUCT or the GENERATED SOFTWARE are granted or conveyed to CUSTOMER whether by implication, estoppel, or otherwise. All right, title and interest in the LICENSED PRODUCT shall remain with ELEKTROBIT or its licensors.

2.11 NOTICES. Except for any notices required for open source components, notices or patent markings required by ELEKTROBIT and/or its licensors to be included in the CUSTOMER PRODUCTS shall be set out in the AGREEMENT. CUSTOMER shall be responsible for reproducing all such markings in the CUSTOMER PRODUCTS, together with any notices and markings required due to open source components, applicable law, regulations or authority decisions.

3. GRANT OF RIGHTS IN WORK PRODUCTS

3.1 NON EXCLUSIVE WORK PRODUCTS

3.1.1. LICENSE GRANT. ELEKTROBIT grants to CUSTOMER a non-exclusive, worldwide, sub-licensable and irrevocable right in and to NON EXCLUSIVE WORK PRODUCTS and the INTELLECTUAL PROPERTY RIGHTS therein and thereto, limited and restricted (if agreed in the AGREEMENT) to the use in the TARGET SYSTEM and/or the PROJECT.

3.1.2. OWNERSHIP. The ownership and all rights in and to the NON EXCLUSIVE WORK PRODUCTS and the INTELLECTUAL PROPERTY RIGHTS therein and thereto shall vest irrevocably and exclusively in ELEKTROBIT or ELEKTROBIT's licensors without any limitation on use.

As far as partial deliveries have been agreed upon, they shall be separately subject to acceptance procedure and tested separately. Interaction of all the parts together shall be tested according to this Section 4.2.
