

About Elektrobit

[Elektrobit](#) is the trusted partner in the transition to the software-defined vehicle (SDV). With over 35 years of award-winning automotive software expertise, Elektrobit's innovative portfolio and comprehensive SDV ecosystem empower OEMs, Tier 1s, along with ODMs and Big Tech to build future-ready solutions with speed and confidence. Its SDV building blocks include operating systems, middleware, embedded software, digital cockpit solutions, engineering services, and development workflows - driving faster innovation and seamless integration across the vehicle lifecycle. Elektrobit software powers over five billion devices in more than 630 million vehicles worldwide. It is a wholly owned, independently operated subsidiary of AUMOVIO.
